DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, Claim(s) 1-13, drawn to a method of lysing an acid-fast bacterium.

Group II, Claim(s) 14-30, drawn to a method of lysing an acid-fast bacterium.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

A method of lysing an acid-fast bacterium to extract a gene from the acid-fast bacterium, comprising: heating the acid-fast bacterium in a liquid containing a non-ionic detergent at a temperature below a boiling point of the liquid. (Folgueria et al. "Detection of Mycobacterium tuberculosis DNA in Clinical Samples by Using a Simple Lysis Method and Polymerase Chain Reaction" Journal of Clinical Microbiology. April 2003. Vol. 31, No. 4, Pages: 1019-1021; Page 1019, Column 2). The said method cannot therefore be considered a special technical feature, as lack of unity rules hold that a

Art Unit: 1637

feature known to a person of ordinary skill in the art makes no advance over the prior art.

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Claims 11 and 28: Species of acid-fast bacterium

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

Claims 11 and 28: Species of acid-fast bacterium

The following claim(s) are generic: 11 and 28

Art Unit: 1637

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

A method of lysing an acid-fast bacterium to extract a gene from the acid-fast bacterium, comprising: heating the acid-fast bacterium in a liquid containing a non-ionic detergent at a temperature below a boiling point of the liquid. (Folgueria et al. "Detection of Mycobacterium tuberculosis DNA in Clinical Samples by Using a Simple Lysis Method and Polymerase Chain Reaction" Journal of Clinical Microbiology. April 2003. Vol. 31, No. 4, Pages: 1019-1021; Page 1019, Column 2). The said species cannot therefore be considered a special technical feature, as lack of unity rules hold that a feature known to a person of ordinary skill in the art makes no advance over the prior art.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
